Is There No New Omar Among You?!

"This is a call for all the muhajirin who did not join the ranks of the Islamic State in Sham: be warned! The Sahawat do not differentiate between one muhajir and another, and to join the ranks of the Islamic State is best for you, and do not think that by joining a certain group you are protected from them...".

With these words, Shaykh al-'Adnani - may Allah accept him - sounded the alarm nearly 8 years ago for the muhajirin in Sham, warning them from the war that will be launched against them and the conspiracy that will target them from the Sahawat sooner or later, and that even if these groups of ridda looked the other way for some time, they are sure to fight them later.

The speech of Shaykh al-'Adnani was deeper and more knowledgeable when he addressed the muhajirin back then, saying: "do not think that by belonging to a group they will not harm you". This is the mistake which many of these fighters made, thinking that by working under the cover of these groups of ridda they will be protected or excluded from being chased! That did not help them and they were harassed and fought inside these groups until they had to separate from them and became pursued everywhere by the militia of the murtadd Golani and his scum followers who try to win his satisfaction with the anger of Allah! Just like what he does with the tawaghit of the region and their murtadd intelligence officials.

After the harassment and pursuit, many of the foreign fighters had to form groups known as "independent," which includes the runaways from the tyranny of Golani's militia and the groups following him, believing that this delusional independence will protect them from being targeted. They haven't realize that the reason they're targeted is simply because of their existence on the land of Sham, even if they didn't fight the regime. It because all the political solutions on the table require that they leave Sham and return to their countries willingly or unwillingly! This is why in the last few years their fate was either in the prisons of Golani or dead bodies in the streets of Idlib. And those who survived got picked up by drones so it completes the role that Golani and his soldiers were unable to complete! And those who survived all of that become pursued in the woods and caverns awaiting their destiny in an upcoming Golani or Nusayri campaign!

This is what happened recently in a security campaign launched by Golani's militia against groups of foreign fighters in the Turkman Mountain and its neighboring regions, which came as an execution for the external commands to pave the way in front of applying the Turkish-Russian agreements, where both the Russians and the Turks along with the Sahawat consider the presence of these groups not included in the "Turkish consensus" a hurdle in front of their agreements. So the best solution for the intelligence of these countries was to hire Golani again so he would lead a major military operation which targets the regions of the foreign fighters, preceded by a media campaign which accuses them with crimes of kidnapping and murder and theft, and portraying them as Khawarij and Takfiris and other ready-made accusations which they previous accused the Islamic State with and many of these same fighters believed them then! And today they are thrown with the same accusations by those they supported before in their tyranny! and now they're being burned by their fire. So contemplate this.

If the foreign fighters thought about what it means for Golani's militia to use the "accusation" of being affiliated with the Islamic State, to use that to legitimize fighting them and turning against them, they would have known that this Islamic State is on the right path, as that means they're asking for the international and regional community's support to fight them. Fighting the Islamic State is a common goal among every taghut in the east and west! Can these foreign fighters trace the arrows of the people of falsehood that are guided towards the people of righteousness, and differentiate between good and evil?!

After long years of battle in Sham, the foreign fighters still did not grasp the truth behind the struggle, and they're still unable to use their ears and eyes to realize the truth! They trying to stand in a grey area between truth and falsehood! They didn't know that this grey area is another form of falsehood! It is similar to their refusal to admit the righteousness of the Islamic State and how accurate and honest their warnings and advice has been, which they were presented with since their first day in Sham. But they don't like advisors!

The foreign fighters are still paying the price for not taking the right path and being tardy in joining the Khilafah and uniting under a single Imam that orders them with tawhid and forbids them from shirk. They would like under the shade of the Islamic State the glory and generosity in fighting the taghut and its soldiers, whatever his name, instead of the delusion of fighting the Nusayri regime alone. They're watching how many of the murtadd groups became protectors of the murtadd regime! And these fighters have experienced how Golani's militia prevented them by force from fighting the Nusayri regime, and how they surrendered many regions in applying the conventions of treason! How is it then that the solution is in fighting the Nusayri regime and leaving the bodies of the other murtadd regimes which are roaming about in Idlib and its surrounding areas?!

The intelligence agency's touch was obvious in recording and directing "the leaders of the foreign fighters" in a humiliated image, the same image the governments show the leaders of crime organizations and criminals! As if it's a felony! But that did not shake anything in the heads of these groups, and they did not realize that the war launched at them by the murtadd Golani's militia is the same war against the murtadd Nusayri regime and the intelligence agencies of ridda, and they are still differentiating between fighting one taghut and another! and one murtadd and another!

Let the foreign fighters know that the war of Golani's militia and his parties against them will not stop until they are eradicated, because they consider them a "hurdle" in the face of their projects of settlements and the solutions suggested in the region. Those they were quiet about yesterday are fought today, and those left today they won't leave tomorrow, and the wise is who took example from others.

O foreign fighters in Sham, we repeat to you once again this advice and the invitation of the leaders of the Islamic State and they are honest: your survival is in joining the Islamic State and giving bay'ah and living under its flag, and repenting and declaring innocence from the ignorant flags due to which you were separated from us yesterday, as they are fighting you today using the same alibis they used before.

O foreign fighters - no matter your names or origins - come to the Islamic State and its soldiers who remained steady on their religion and doctrine, not changing nor deviating, and who kept fighting the Nusayri regime and those protecting it among the murtadd groups and militias which are fighting you now to satisfy the tawaghit of Turkey and Russia.

O foreign fighters, is there no new Omar among you?! Is there no wise man among you whotakes example from the good men before you who gave bay'ah to the Islamic State after Allah enlightened them and guided them to the truth with His grace? Come to the valley of faith and villages of goods and bliss, as in it you will find goodness and bliss, and in it there are men who we believe and have remained sincere to what they promised Allah. So repent from your tardiness from bay'ah and unity, and rush to the lands of Wala' and Bara', before you are doomed with the conspiracies of the hyenas, and then it is too late for regret. The pioneer does not lie to his folks.
